Abstract
Replace this with your own abstract. State the problem, what you did, and what you found — in that order, and without citations.

Keywords: bioimpedance, skin-electrode interface, motion artefact

Introduction

Start here. Cite things like this [1].

Method

Describe your method here.

Results

Present your results here.

Tab. 1: Contact impedance at 10 kHz.

Electrode	Static (Ω)	Under motion (Ω)
Ag/AgCl	420	610
Dry textile	1,850	2,940

Table 1 shows the measured impedance values.

Conclusion

Say what it means.
