Accessible Presentations by Default

Noor Fatima

August 27, 2026

Why a class, not a package

- Beamer builds presentations on top of the article class

Why a class, not a package

- Beamer builds presentations on top of the article class
- ltx-talk is written from scratch as a presentation class

Why a class, not a package

- Beamer builds presentations on top of the article class
- ltx-talk is written from scratch as a presentation class
- That lets it produce properly tagged, accessible PDF output

What you get

- Structured headings and reading order
- Overlay support without hand-rolled tricks
- A footer that tracks title, author and frame number

Try it yourself

Install from CTAN or TeX Live, then compile with pdflatex, LuaLaTeX or XeLaTeX — the class does not require a specific engine.
