ABSTRACT

This thesis argues that a single, well-structured class can carry the full weight of graduate thesis production, from title page through bibliography. We demonstrate the approach with a worked chapter, a cited source, and a compiled bibliography.

APPENDIX SUPPLEMENTARY MATERIAL 4

CHAPTER 1

INTRODUCTION

Thesis templates tend to specialise per institution. Knuth [1984] shows that the underlying typesetting engine does not require this — the constraints come from institutional convention, not from TEX itself.

1.1 Structure of this Document

The remaining chapter extends this argument with a worked example.

CHAPTER 2

RELATED WORK

Prior systems addressing long-document typesetting are surveyed in Knuth [1984].
