Hiring Committee
Delta Bridgeworks Ltd
14 Wharf Street
Auckland 1010, New Zealand

Dear Hiring Committee,

I am writing to apply for the Senior Structural Engineer position advertised on your careers page. I have spent the past six years designing pedestrian and light-rail bridges for Southern Cross Infrastructure, most recently leading the structural design for the Wynyard Point pedestrian bridge, a 140-metre cable-stayed span that opened eight months ahead of schedule.

What draws me to Delta Bridgeworks specifically is your recent work on seismic retrofits for heritage-listed structures — a problem that combines the structural rigour I enjoy with the constraint-driven creativity of working within a protected facade. I have led two similar retrofit projects, both requiring close collaboration with heritage architects to reconcile code compliance with preservation requirements.

I would welcome the opportunity to discuss how my experience in long-span and retrofit design could contribute to your upcoming projects. I have attached my CV and portfolio, and I am available for an interview at your convenience.

Yours sincerely
Marguerite Okafor
