Summary

Research engineer with a decade of work on mechanical computation. Replace this paragraph with two or three lines on what you do and what you are looking for.

Experience

Lead Analyst, Institute of Analytical Engines 2021–present
London, United Kingdom

- Led the note-programme for the Analytical Engine, describing the first algorithm intended for machine execution.
- Quantify your results. "Cut build times 40%" beats "improved build performance".

Research Assistant, Difference Engine Works 2018–2021
Cambridge, United Kingdom

- Describe the work in terms of what changed because you were there.

Education

MSc, Mathematics 2018
University of London

BSc, Mathematics 2016
University of London

Skills

Languages English (native), French (fluent)
Technical Numerical analysis, symbolic computation, LaTeX
